

### Which of These Fundus Images Was Created by Artificial Intelligence?

Artificial intelligence (AI), especially ChatGPT, can create unique documents, songs, videos, and images. In the 4 fundus images (A, normal, B, normal, C, retinoblastoma, D, retinoblastoma), which do you think are real and which were created by AI? **Answer: B and D are real. A and C were created by ChatGPT** with the following prompt: “Create a 30-degree fundus image of a (normal fundus and a retinoblastoma). Make it a genuine, accurate medical image.” The query was submitted on July 31, 2025, using the GPT-5 model. It can be difficult to discern if an image is real or created by AI. The teaching and fraud potential of AI-generated images is powerful. We hope to alert clinicians to both through this demonstration. (Magnified version of Figure A-D is available online at [www.aaojournal.org](http://www.aaojournal.org)).
